ArduinoJson 5.13.3

🏷 v5.13.3   ⦿ `0d4a930`

👤 **bblanchon** released this on 6 Oct 2018

Changes since 5.13.2

- Improved float serialization when `-fsingle-precision-constant` is used
- Fixed `JsonVariant::is<int>()` that returned true for empty strings
- Fixed `JsonVariant::is<String>()` (closes #763)

How to install

There are several ways to install ArduinoJson, from simpler to more complex:

1. Use the Arduino Library Manager
2. Download `ArduinoJson-v5.13.3.h` put it in your project folder
3. Download `ArduinoJson-v5.13.3.zip` and extract it in you `libraries` folder

Note: `ArduinoJson-v5.13.3.h` are `ArduinoJson-v5.13.3.hpp` are almost identical; the difference is that the `.hpp` keeps everything in the `ArduinoJson` namespace.

ℹ The complete documentation is available on arduinojson.org
